

2004 GOLDEN TEE FORE!

WITH PETER JACOBSEN

NOW, MORE THAN EVER!

Golden Tee Fore! 2004 includes more new features than ever before! It just keeps getting better!

Seven New Courses!

Two "Amateur" courses and three "Pro" courses are offered in Stroke and Skins play. The "Amateur" courses are specially designed to give new players a training ground, and have a great game play experience. New messages appear on the Amateur courses that help the player learn the finer points of playing, and avoid frustration. These courses should provide a great entry point for new players, who will enjoy their success and want to play more.

League Play features the same three "Pro" courses from Stroke play, and two additional "Pro" courses exclusive to online play. Exceptional course design and advanced texture mapping technology has been used to make all of the 2004 courses more beautiful and interesting than ever.

New Heads-Up View!

For the first time players will be able to raise their view toward the sky to help them determine how high an obstruction is. The player simply presses and holds the Fly-by button to activate this helpful feature.

Improved Putting and Aiming!

Enhancements have been made to make putting and player orientation smoother and more predictable. Improved aiming will keep the player pointing toward the green at every shot, avoiding confusion and disorientation.

Improved Leaderboards!

A player's best score only will be listed on the local "Scores Posted Here" tournament leaderboard. Now, one player will not be able to dominate the "Scores Posted Here" board.

High scores achieved with Mulligans in stroke play will no longer appear on the Stroke Play leaderboards. Now amazingly low scores achieved through mulligan play will not deter other players from playing.

New Celebrity Attract Mode!

Eye-catching attract mode videos will bring players to the game. Well-known GT players and celebrity fans of Golden Tee are featured in a variety of engaging videos. Players will enjoy the variety and personality of these new screens.

Improved Handicapping System!

The ITNet handicapping system has been improved to help prevent sandbagging. This feature, combined with improved League and Contest tools available through the Internet, makes it easier than ever to run local contests and events.

New Hole-N-Win Option!

Players can now win cash prizes on any course! At various times, players are given the opportunity to insert additional coins to win an additional prize for achieving a hole-in-one on a par 3 or a par 4 hole. If the player gets a hole-in-one, he enters his name and address right on the game, and is given an authorization code. The data is sent back to IT with the next ITNet phone call, and a check is sent right to the player!

The Hole-N-Win feature will be available to players on an occasional basis. A new icon on the screen lets players know if Hole-N-Win is available before they play. HNW is only available if the game is online, and where legal. Operators also have the ability to manually disable this feature on their games.

New Closest to the Pin Promotional Mode!

In the US, Anheuser-Busch is launching a new national program involving Golden Tee Fore! 2004. Michelob Light wholesalers across the country will have an exclusive swipe card that can activate a special Closest to the Pin (CTP) game mode. When they use their card on an online machine, the game will ask the advertiser's representative to then put money in the game to rent it in 15 minute increments. It costs \$7.00 for 15 minutes or \$25.00 for an hour, and the money is put right into the machine. This additional income goes directly from the sponsor to the machine owner, and is listed as a line item on the game's audits pages.

Once the money has been entered and "YES" is selected, the game will reboot in a few seconds and enter the CTP mode. This mode is in free play, and offers players the chance to shoot for a hole in one. The wholesalers are planning on running some fun events with great prizes, and qualifying players into regional and even national contests.

Operators also have access to this exciting promotional mode through the operator test menus. This feature is great for player parties and other local events. Operators also have the ability to disable this feature if necessary.
